BENEFITS OF ADDING GPS SPRAYING TO YOUR OPERATION

Save Product

- Golf courses save anywhere from 15-25% on product utilizing GPS compared to manual boom switches.
- Repeatable applications also allow the operator to mix only the product that will be used for each application.
- [USGA Article](#)
- [Golf Course Industry Article](#)

Save Time

- Automated and digital record keeping of all applications
- Mix only the product you'll need
- No more foamers and no more guessing where your application stopped before fill up
- More efficient operator passes

Increase Accuracy

- RTK corrections provides sub-inch and repeatable accuracy
- Ag Leader's DisplayCast feature allows multiple units to communicate with one another. Eliminating overlap between multiple sprayers

Remote Support

Our sprayers are internet connected and can be accessed remotely. Turf managers (and their dealer) have the ability to remotely monitor exactly how applications are being performed. This also allows for quick troubleshooting as questions arise.
